

PRODUCT SHEET

Tomberry® pearl tomato

The Tomberry® brand of pearl tomatoes represents a new breakthrough in the use of tomatoes. The possibilities without cutting and leaking are endless, which make these Tomberry® tomatoes unique. Add Tomberry® to your salad and experience the excitement when the tomato bursts in your mouth. Also try the effect in (tomato)soup or sprinkled on your pizza or omelet. So, are you ready for the Tomberry® experience?

Growing guidelines

- Sowing temperature around 25 °C is recommended
- Start with 3.0 plants per m²
- More bumblebees are needed to achieve optimal setting
- The clusters are harvested as a whole, when ±90% of the fruits are mature
- One cluster: around 130-150 fruits
- After about 4-5 days of drying, the ripe fruits can be shaken off the cluster easily

Classification*

GSPP

Variety code	T015-466 (red) * T015-469 (yellow)
Colors	Red & yellow
Shape	Round, slightly oval shape
Fruit size	1,0 x 1,5 cm
Fruit weight	1,5 - 2 grams
Brix	8 - 9
Resistance	ToMV2
Production	10 - 15 kg/m ²

* Based on North Western European climate conditions
