### Declaration of the absence of GMO

All varieties in Eminent Seeds present range are obtained without making use of genetic modification techniques which lead to genetically modified organisms (GMOs) to which Directive 2001/18 of the European Parliament. Eminent Seeds does not market or sell varieties that have been developed by using genetic engineering. In the unlikely event that we decide to change our policy in the future, we will inform you of our decision.

### GSPP – Good seed and plant practices

Eminent Seeds operates in accordance with the GSPP standards:

GSPP is a standard that aims to prevent tomato and tomato rootstock seeds and plant lots from being infected by *Clavibacter michiganensis* subsp. *Michiganensis* (Cmm). Eminent Seeds is a proud member of accredited companies with certified production sites. On the packaging of our seeds is mentioned if the seeds are produced under GSPP conditions.

### Seed treatment

Eminent Seeds declares that the seeds have not been treated with prohibited substances according to the European Laws. Seed treatment is only applied in case it considers to be the most effective method to control a possible disease and/or pest, and/or to realize a reduction in crop spraying; Eminent Seeds acts hereby in conformity with the applicable statutory regulations.

With Kind Regards,  
Eminent Seeds B.V.
